

I want to take a moment to recognize Kyle Butler of KPM Communications for an outstanding experience on a recent customer installation. His unique blend of knowledge (both of the industry and his product), his dedication to an outstanding customer service and his accessibility and great communication combine to make him a huge asset to any client.

Furthermore, Dennis, the gentleman Kyle sent to perform the transition to the new service, was excellent as well. He was on time, personable and knowledgeable. My technicians were very impressed and one even mentioned he wished all of the companies we worked with were more like KPM.
